AUDIT COMMENTS

* * * * *

Operational Housing

14. The auditors were informed that a recent survey of operational housing at the Base had disclosed that no foreign real property reports had been submitted to Headquarters on the majority of such housing as required by FR 45-1400. This was due in part to the unfamiliarity of project case officers with pertinent real estate regulations and the lack of a central control point at which the various facts required in such reports could be accumulated. In order to correct this situation the Base Support Officer and operational housing officer plan to centralize all operational housing activities in the operational housing office. No detailed audit of operational housing procedures was undertaken pending implementation of these plans.
